Thin Solid Films, *200* (1991) 399–401

Contents of Volume 200

Issue 1

Photoelectrochemical and solar cell studies of n-CdSe films grown by repeated electrodeposition cycles 1
R. K. Pandey, S. R. Kumar and A. J. N. Rooz (Bhopal, India) and S. Chandra (Varanasi, India)

Influence of the silver layer on the optical properties of the $TiO_2/Ag/TiO_2$ multilayer 11
I. Dima, B. Popescu, F. Iova and G. Popescu (Bucharest, Romania)

Carbon-doped α-Al_2O_3 films synthesized on cemented carbide tools by the metal organic LPCVD technique 19
A. Kwatera (Cracow, Poland)

Auger and electron energy loss spectroscopies study of the oxidation of AlSb(001) thin films grown by molecular beam epitaxy 33
F. W. O. Da Silva, C. Raisin, M. Nouaoura and L. Lassabatere (Montpellier, France)

The quenching stress in thermally sprayed coatings 49
S. Kuroda and T. W. Clyne (Cambridge, U.K.)

An *in situ* Auger electron spectroscopy study of chromium thin film coverage of copper surfaces: effects of surface morphology, temperature and environment 67
H. Lefakis (San Jose, CA, U.S.A.) and P. S. Ho (Yorktown Heights, NY, U.S.A.)

Copper films from aqueous solutions of copper nitrate trihydrate 77
D. R. Sparks and G. M. Vest (West Lafayette, IN, U.S.A.)

The influence of the substrate temperature and the source temperature on the structure of thin $Cd_{1-x}Mn_xTe$ films 83
S. Miotkowska, I. Miotkowski and D. Zymierska (Warsaw, Poland)

TiN_xO_y as a barrier between Cr–Si–(O) and aluminium thin films 93
K.-H. Bather and H. Schreiber (Dresden, F.R.G.)

Lattice distortion in thin films of IVB metal (Ti, Zr, Hf) nitrides 117
I. Goldfarb, J. Pelleg and L. Zevin (Beer-Sheva, Israel) and N. Croitoru (Tel-Aviv, Israel)

Electrochemical and plasma anodic oxidation of $Cd_xHg_{1-x}Te$ 129
V. P. Parkhutik (Minsk, U.S.S.R.), J. M. Martinez-Duart (Madrid, Spain), J. Perrière (Paris, France), A. Climent (Madrid, Spain), Yu. E. Makushok (Minsk, U.S.S.R.) and J. M. Albella (Madrid, Spain)

Surface properties of diamond and diamond-like hydrogenated amorphous carbon films resulting from r.f. plasma etching 139
K. Kobayashi and N. Mutsukura (Saitama, Japan) and Y. Machi (Tokyo, Japan)

On the formation of copper-rich copper silicides 147
L. Stolt, F. M. D'Heurle and J. M. E. Harper (Yorktown Heights, NY, U.S.A.)

WSe_2 thin films prepared by soft selenization 157
A. Jäger-Waldau and E. Bucher (Konztanz, F.R.G.)

Atom–atom potential calculations on Langmuir–Blodgett films: structure of stearate films 165
M. V. Alfimov, A. A. Bagaturyants and K. Ya. Burshtein (Moscow, U.S.S.R.)

Thermally stimulated discharge currents in iron-doped cellulose acetate films 173
A. K. Sharma and Ch. Ramu (Tirupati, India)

Properties of insoluble monolayers and Langmuir–Blodgett multilayers of a series of isomeric alkylphenyl carboxylic acids 181
R. Aveyard, B. P. Binks and P. D. I. Fletcher (Hull, U.K.), H. Ancelin and J. Yarwood (Durham, U.K.)

Issue 2

Electrical and switching properties of InSe amorphous thin films 203
M. A. Kenawy, A. F. El-Shazly, M. A. Afifi, H. A. Zayed and H. A. El-Zahid (Cairo, Egypt)

Investigation of the dependence of the contact resistance on the external gold layer in AuNiGeAu/n-GaAs 211
S. J. Chua, S. H. Lee, R. Gopalakrishnan, K. L. Tan and T. C. Chong (Singapore, Singapore)

A method for the measurement of thin film optical constants with a spectral photometer from 230 nm to 850 nm and its application to plasma silicon (oxy)nitride. 219
R. Brendel, R. Ziegler and R. Hezel (Erlangen, F.R.G.)

Interference grating fabrication in spin-coated As_2S_3 films 229
E. Hajto, P. J. S. Ewen, R. E. Belford and A. E. Owen (Edinburgh, U.K.)

Thin resistive film with temperature coefficient of resistance close to zero 239
J. Zelenka, V. Chudoba and J. Rehák (Králové, Czechoslovakia) and K. Roháček (Prague, Czechoslovakia)

Determination of differences in tribological behavior and surface morphology between electrodeposited and traditional phosphate coatings 247
S. C. Tung, D. J. Smolenski and S.-C. S. Wang (Warren, MI, U.S.A.)

Adhesion, microstructure and composition of thermally evaporated aluminium thin layers on polyethylene terephthalate films 263
P. Phuku, P. Bertrand and Y. de Puydt (Louvain-la-Neuve, Belgium)

Ion-beam-induced mixing of the bilayered structure amorphous TiNi/Ni 275
R. J. Gaboriaud and J. Delage (Poitiers, France) and F. Abel (Paris, France)

A comparison of TiN films produced by reactive d.c. sputtering and ion-assisted deposition 283
A. V. Bieli, H. Kheyrandish and J. S. Colligon (Salford, U.K.)

Quantitative secondary neutral mass spectroscopy of thin films 293
J. S. Colligon and H. Kheyrandish (Salford, U.K.), J. M. Walls (Loughborough, U.K.) and J. Wolstenholme (East Grinstead, U.K.)

Effect of ion bombardment on the properties of sputtered amorphous silicon 301
M. S. Aida, S. Boudjaadar and A. Chari (Constantine, Algeria) and L. Mahdjoubi (Annaba, Algeria)

AlN/GaN superlattices grown by gas source molecular beam epitaxy 311
Z. Sitar, M. J. Paisley, R. F. Davis and B. Yan (Raleigh, NC, U.S.A.), J. Ruan and J. W. Choyke (Pittsburgh, PA, U.S.A.)

Preparation of a transparent alumina film doped with fluorescence dye and its energy transfer laser emission 321
Y. Kobayashi and H. Sasaki (Sendai, Japan), S. Muto (Kofu, Japan), S. Yamazaki and Y. Kurokawa (Sendai, Japan)

Characteristics of α-Fe_2O_3 thick film gas sensors 329
W.-Y. Chung and D.-D. Lee (Taegu, South Korea)

Preparation and characterization of r.f.-sputtered multilayered TiN–Au films 341
P. K. Banerjee, J. S. Kim and S. S. Mitra (Kingston, RI, U.S.A.)

Methodology for determining the radiation efficiency and contrast characteristics in the case of electron and ion lithography, using positive polymer resists 353
K. Vutova and G. Mladenov (Sofia, Bulgaria)

Modeling of fluorescence emission from cyanine-dye-impregnated Langmuir–Blodgett films deposited on the surface of an optical fiber 363
S. Zhao and W. M. Reichert (Durham, NC, U.S.A.)

Formation of highly ordered thin films of perfluorinated carboxylic acids and azobenzenes by thermal evaporation 375
R. Jones, R. H. Tredgold, Z. Ali-Adib and A. P. L. Dawes (Lancaster, U.K.) and P. Hodge (Manchester, U.K.)

Spectroscopic and chemical study of the damage induced by ion implantation in scandium diphthalocyanine thin films. 385
S. Robinet, M. Gauneau, M. Salvi and C. Clarisse (Lannion, France), M. Delamar and M. Leclerc (Paris, France)
